

AMERICAN
SOCIETY FOR
MICROBIOLOGY

Attestation Form

As an organization accredited by the Accreditation Council for Continuing Medical Education (ACCME) ASM has specific policies regarding the disclosure and resolution of a speaker's conflict(s) of interest for all educational activities. All speakers and planners must disclose financial relationships with commercial interests that are relevant to their presentation and these disclosures are provided to the activity participants. Should a speaker/planner disclose a relevant financial relationship, ASM takes steps to resolve that conflict through a variety of resolution mechanisms and ensure that all presentations are evidence-based and free of commercial bias.

Per ASM's policy, please review the statements below and indicate whether you agree or disagree. You must also electronically sign this form by providing your full name below. Should you have questions regarding this form or any aspects of ASM's policies regarding disclosure of relevant financial relationships, please contact cmeservices@asmusa.org.

Attestations

Please indicate your understanding of and willingness to comply with each statement below. If you have questions regarding your ability to comply, please contact cmeservices@asmusa.org as soon as possible.

- I disclosed to ASM all relevant financial relationships and I understand that ASM will disclose this information in print to participants of this activity.
- The content and/or presentation of the information with which I am involved will promote quality or improvements in health care and will not promote a specific proprietary business interest of a commercial interest. Content for this activity, including any presentation of therapeutic options, will be well- balanced, evidence-based and unbiased.
- I have not accepted any honoraria, additional payments or reimbursements beyond that which has been agreed upon directly with ASM.
- I understand that my presentation will be monitored to be sure that it is educational and not commercial in nature.
- If I am providing recommendations involving clinical medicine, they will be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients. All scientific research referred to, reported or used in CME in support of justification of a patient care recommendation will conform to the generally accepted standards of experimental design, data collection and analysis.
- If I am discussing specific health care products or services, I will use generic names to the extent possible. If I need to use trade names, I will use trade names from several companies when available, and not just trade names from any single company.
- If I have been trained or utilized by a commercial entity or its agents as a speaker (e.g., speaker's bureau) for any commercial interest, the promotional aspects of that presentation will not be included in this activity.
- If I am presenting research funded by a commercial company, the information presented will be based on generally accepted scientific principles and methods, and will not promote the commercial interest of the funding company.
